technology

2032 Sleeping Battery<sup>®</sup>  
Breakthrough Keyless Go  
car theft protection

## THE CHALLENGE

Thousands of cars are stolen yearly by relay attack and this type of theft is increasing more and more.

# Breakthrough Keyless Go car theft protection

## THE SOLUTION

Sleeping Battery solves this problem with a simple and very effective solution.

## HOW IT WORKS

Sleeping Battery is the same battery as your normal car key battery, but it has a motion sensor built in.

## HOW TO INSTALL?

Just exchange your key battery for Sleeping Battery.

- Kiwa SCM certified security system
- Lithium cell 3V
- Secures your car in 3 minutes
- Non-motion sleep mode
- Disables car-key communication

An easy to use solution which prevents car thieves from gaining access to your car via your keyless entry system. The patented micro chip within will put the battery into sleep mode after 3 minutes of non-movement meaning the key will no longer transmit a signal and your car is protected against relay attack. Just exchange your car key battery for our **Sleeping Battery** and your car is safe!
